Better Living, Better Care

Product Key Features

Brushless Motor

Brushless motors provide a smooth, quiet ride in electric wheelchairs while offering higher efficiency, longer battery life, and superior durability.

Our brushless motor operate quietly, require minimal maintenance, and offer precise control for smoother rides. Their compact, lightweight design improves portability, while advanced safety features like overheating protection ensure reliable, long-lasting performance, ideal for daily mobility needs.

*All Better Electric Wheelchair come with a pair of 250w Brushless Motors.

Easy Charge

The easy charge feature allows users to charge the batteries with high flexibility - no bending or kneeling required.

All of our controllers include a built-in charging port, enabling users to charge the batteries directly through the controller. The included junction cable allows simultaneous charging of both batteries. Users also retain the option to charge each battery individually if needed.

*Some of Better Electric Wheelchair only come with one battery.

Smart Controller

Our smart controllers are precise, accurate, and easy to use. The digital screen enables users to effortlessly monitor the wheelchair's operation.

The intuitive LCD screen provides clear, easy-to-understand controls. With sine wave control technology, operation becomes smoother, safer, and more comfortable.

*We offer a diverse range of smart controller, please contact us for more details.

Duo Batteries

The Duo lithium Batteries (24V 6.6Ah each) deliver stable performance, extended travel range, and air-travel-friendly convenience.

All our lithium batteries (6.6Ah-26Ah) are 50% lighter than lead-acid, last longer, and charge in 3-6 hours. The included joint cable lets two batteries work together—no swapping needed.

*Some of Better Electric Wheelchair only come with one battery.

*Standard configuration includes 6.6Ah lithium batteries. Other capacities available upon request.

Remote Controller

The wireless remote controller provides added flexibility and independence for both users and caregivers.

Most of our electric wheelchairs can be operated via remote control stick, freeing the user's hands while giving caregivers greater control.

*The remote controller is available as an optional accessory (additional cost). Please inquire for details.

Our Wheelchairs

Better Ultra Lightweight

Designed for outdoor and travellers, this wheelchair combines lightweight design, long-range performance, and user-friendly features for seamless mobility.

- Lightweight carbon fiber frame - 13 kg (excluding batteries)
- Dual Battery System - Up to 25 km range, with digital displays for real-time power monitoring.
- 250W Brushless Motor - Smooth, quiet ride at 6 km/h with reliable braking.
- Smart Controller - Precise handling and digital display for speed, battery life, and more.
- Swing-away Footrest - Easy access for comfortable seating and leg positioning.

Better Lightweight

Designed for outdoor enthusiasts, this wheelchair combines durable construction, lightweight portability, and enhanced comfort for smooth and reliable mobility on the go.

- High-Strength Aluminum Frame - 16 kg (excluding battery)
- Luggage-Style Design - Easy to store and carrying
- 250W Brushless Motor - Smooth, quiet ride at 6 km/h with reliable braking.
- Smart Controller - Precise handling and digital display for speed, battery life, and more.
- Comfort Features - Shock absorbing springs, sponge cushion, and a joint footrest for comfort.

Better Daily

Designed for daily use, this wheelchair combines durable construction, long-range performance, and enhanced comfort for smooth and reliable mobility on the go.

- High-Strength Aluminum Frame - 18 kg (excluding batteries)
- Dual Battery System - Up to 25 km range.
- 250W Brushless Motor - Smooth, quiet ride at 6 km/h with reliable braking.
- Smart Controller - Precise handling and digital display for speed, battery life, and more.
- Comfort Features - Shock absorbing springs, sponge cushion, swing-away footrest for access.

Better Essential

Designed for greater freedom, this affordable wheelchair meets all your needs with durable construction, long-range performance, and enhanced comfort.

- High-Strength Aluminum Frame - 21 kg (excluding batteries)
- Dual Battery System - Up to 20 km range.
- 250W Brushless Motor - Smooth, quiet ride at 6 km/h with reliable braking.
- Smart Controller - Precise handling and digital display for speed, battery life, and more.
- Comfort Features - Shock absorbing springs, sponge cushion, and a joint footrest for comfort.

Better Comfort Manual

Designed for home and care facilities, this affordable wheelchair folds easily for storage or transport, featuring a sponge cushion and swing-away footrest for enhanced comfort.

- High-Strength Aluminum Frame - 12 kg
- Real Spoke Wheels - 22" real spoke wheels with PU tyres
- Swing-away Footrest - Adjustable and easy access for leg positioning.
- Comfort Features - Sponge cushion and PU arm pads for extra comfort
- Multiple Handbrakes - on the wheels and a backrest handle for added control and safety

Specification

Better Ultra Lightweight

| | | | |
|----------------------------|-------|------------------|---------------|
| Overall length | 95cm | Load weight | 120kg |
| Vehicle Width | 56cm | Climbing Ability | ±10° |
| Overall height | 90cm | Motor Power | 24V DC250W*2 |
| Base width | 42cm | Battery* | 24V6.8AH/10AH |
| Front / Rear Wheel Size | 7/11" | Travel Range | 10-25km |
| Weight (Exclude Batteries) | 13kg | Speed (km/hours) | 1-8KM |

*Double batteries with digital Screen
